11 故障排除

问题	可能有效的解决方案
在烹饪过程中出现溢流。	烹饪某些原料时可能会产生大量泡沫，从而导致溢流。在烹饪过程中打开盖子可以减少泡沫量，从而降低出现溢流的可能性。请确保养生壶中的原料不超过产品指示的最高水位标记。原料过多会导致出现溢流，应加以避免。
“-- --” LED在闪烁，除了电源键，所有的按键都没有反应	在烹饪时,若养生壶没有在电源底座上就会出现此种情况。在运行加热程序时，如果您将养生壶从底座中提起，然后在5分钟内将其放回，系统将继续选定程序的操作，并完成剩余烹饪时间。如果超过5分钟时间后将养生壶放回其底座上，系统将取消之前选定程序的操作，您需要重新启动程序。
养生壶响了4次，但是仍然自动关机。	养生壶已经触发了防干烧保护机制。该养生壶配有防干烧保护机制。如果在壶中无水或水太少的情况下意外通电，此机制会自动切断电源。养生壶会自动关机，同时电源键的灯也会熄灭。让养生壶冷却一会，方可再次使用。
我尝试打开养生壶的电源，但是仍然自动关机。

11 Troubleshooting

Issue	Potential solution
Overflow happens during cooking	A large amount of foam might form when cooking certain ingredients and this could lead to overflow. To open the lid during cooking could reduce the amount of foam and decrease the chance of overflow. Make sure ingredients in the kettle do not exceed the maximum level indicated on the product. Adding too many ingredients will lead to overflow and should be avoided.
LED “-- --” is flashing and all the keys have no response other than power key.	Kettle is not on the power base while cooking. When a program is running, if you lift the kettle from its base and put it back within five minute, the selected program will resume and the remaining cooking time will be completed. If it takes longer than five minutes before kettle is put back on the power base, then the previously selected program will be cancelled and you would need to restart the program again.
The kettle beeps four times and switches off automatically.	The kettle activated the boil-dry protection. This kettle is equipped with boil-dry protection. This device automatically switches off the kettle if it is accidentally pressed on when there is no water or not enough water in it. The kettle will switch off and power-on light will go off. Let it cool down. The kettle is ready for use again.
I try to switch on the kettle, but it switches off automatically.
